Driving license

Category B

Additional Information

I am an Information Security Specialist with over 2 years of hands-on experience deploying and hardening security infrastructure for enterprise clients. My core expertise includes NGFW Infotecs, S-Terra crypto gateways, Astra Linux 1.8, and network security (Eltex L2/L3, VLAN, ACL). I have also led full-cycle commissioning (PnP) of servers, hypervisors, and security products like Efros Defence Operations Network Assurance.

I am applying for the IT Support Technician position at Help AG because I see it as a strategic entry point into the Dubai market and into a company that values security excellence. While my background is deeper than typical support roles, I am fully prepared to contribute operationally from day one — troubleshooting endpoints, managing AD/Office365, responding to incidents, and maintaining infrastructure health. My security mindset means I will not just resolve tickets, but also identify and address root causes, reducing future incidents.

I am available for relocation and visa sponsorship. I am confident that my combination of support experience and security expertise makes me a unique asset to Help AG. I would welcome the opportunity to discuss how I can contribute to your team.

Thank you for your consideration.
